# Because investments have to make a solid return

---

---

“Automation of our processes is  
a key element in securing our future.”

---

## **Maximise value creation sustainably**

The demands on many manufacturing companies are changing: they have to produce more and often also different product options and always with ever better quality as well as faster and cheaper. So what does this major challenge mean for panel builders and switchgear manufacturers?

For short-term success, it may be enough to mechanise individual machines and processes. However, medium and long-term success is only possible by upgrading the entire process chain.

Seamless  
**automation reduces  
processing times**  
by up to  
**85%**

### **Automation is the key to future-proofing**

The panel building and switchgear manufacturing sector needs comprehensive digitalisation and automation if it is to keep pace with the demands of smart factories and Industry 4.0.

As leading partners to panel builders and switchgear manufacturers, Rittal in association with Eplan offers complete end-to-end system solutions for all processes from a single source.

## Powerful allies: Rittal and Eplan

# End-to-end digitalisation with knowledgeable and experienced partners

---

By mechanising and automating manual tasks in panel building and switchgear manufacturing, quality can be improved and productivity increased. The basis for this is digital integration and end-to-end data consistency across the entire value chain.

We optimise and mechanise every stage in your value process, from engineering, purchasing and manufacturing, through to operations and servicing. This leaves you free to actively focus on driving forward your business and positioning yourself for the future.

[www.rittal.com/manufacturing](http://www.rittal.com/manufacturing)

---

Data continuity and consistency  
in the value process

---

## Digital prototyping – Digital twin

# Plan once – and profit at every stage

---

Digital prototyping is the basis for digitalising your engineering processes. Data is transferred to the digital twin of the real product, so that it has all the relevant information available at all times.

The real product is accompanied by its digital twin throughout the process. Streamlined, error-free planning is the key to super-efficient manufacturing. What is more, the digital twin continues to deliver vital information during subsequent operation and in the event of servicing. For the value creation process, this translates into seamless digitalisation, end-to-end automation, and superior, more cost-efficient production results.

[www.rittal.com/software](http://www.rittal.com/software)

### Digitalisation and automation for maximum efficiency

- Up to 85% shorter processing times for rack and enclosure panels
- 8x faster wire processing
- Frees up skilled workers from performing routine, mundane and time-consuming tasks

## Seamless digital production processes

# Consistent optimisation of quality and organisation

In collaboration with Eplan, Rittal offers a seamless digital solution for the efficient management of production and machine orders. This helps to shorten throughput times, reduce errors and significantly reduce throughput times.

- **Planning/design:** The data from the digital twin developed at the design stage is transferred to the job management system in the RiPanel Processing Center via direct interfaces.
- **Pre-production:** The job management system transfers all production-relevant documents to the machine processes for each specific project. This helps to boost planning reliability and optimise your processes.
- **Production:** The data transferred from pre-production is used by the workstations to ensure efficient project management of each specific task.

Integrating the equipment  
into the digital processes  
is a vital step.

## From design to manufacturing at the push of a button

### Design

The digital twin is developed using Eplan engineering tools and Rittal configurators and includes all production-relevant data.

### Pre-production

Simple, centralised planning of resources and production orders for manufacturing is carried out using the RiPanel Processing Center with its state-of-the-art order management and layout tool.

### Production

The systematic use of digital data in machining and wiring offers a host of benefits and eliminates the need for programming work on the machine.

Handling

## Automating panel building and switchgear manufacturing

# Reliable and safe progress, one step at a time

The solutions offered by Rittal Automation Systems cover a wide range of individual processes throughout the entire production operation – from manual tools to fully automated mechanical engineering.

- Our **equipment** for machining metals is fast, precise and highly efficient.
- Our **automated solutions** for wire processing achieve major efficiency gains.
- Our **ergonomic handling tools** streamline a range of processes involved in manual tasks.
- **We offer bespoke advice**, precise-fit solutions and flexible financing options at every stage of your automation upgrade.

## **Rittal Automation Systems –**

The simple way to automate and mechanise your panel building and switchgear manufacturing.

## **Machining: Perforex MT drilling and milling centre**

# Minimise your processing times with maximum precision

---

Perforex Milling Terminals will significantly accelerate your throughput times when machining anything from the smallest housings and flat panels to large enclosures. These versatile drilling and milling centres are capable of handling all machinable materials, including spray-finished sheet steel and stainless steel as well as aluminium, copper and plastic.

A variety of interfaces support problem-free data transfer from virtually all standard CAD systems and planning tools, such as .dxf, EPLAN Pro Panel, RiPanel Processing Center and Rittal Configuration System. What's more, the RiPanel Processing Center allows you to create layouts directly in the workshop, safeguarding your digital workflow and ensuring high levels of efficiency.

[www.rittal.com/automation](http://www.rittal.com/automation)

#### **Automated machining**

With a fully automated tool changer and an integrated magazine for up to 21 tools, all work operations are completed in a single pass.

#### **Profitable even with a batch size of 1**

With its simple, intuitive programming and option of remote maintenance, the machining centre guarantees a rapid return on your investment.

#### **Top quality**

A choice of operating modes and automatic tool calibration ensure perfect results every time.

## **Machining: Perforex LC laser centre**

# Rapid modifications, even in stainless steel

---

Perforex LC laser centres are ideal for automated mechanical modification of standard enclosures in stainless steel, sheet steel and powder-coated metals. Machining stainless steel enclosures is many times faster and there is no damaging of the cut edges. Even small and medium-sized panels can be machined, shortening the amortisation period still further.

What is more, the machining of spray-finished metal panels with intricate contours and mounting plates with tapped holes can be achieved without any visible damage to the paintwork. Contactless, low-vibration 3D laser machining boasts significantly shorter throughput times and enhanced productivity.

[www.rittal.com/automation](http://www.rittal.com/automation)

#### Highly efficient

Perforex laser centres can machine multiple components in a single operation and from five sides simultaneously, with minimal set-up and operating input.

#### Thread tapping option

The LC 3030 offers even greater flexibility with six thread sizes in the tool magazine and automatic change-over of the machine head.

#### Clean process

Fast, wear-free cutting, even in stainless steel, requires no coolants or lubricants and is exceptionally precise, eliminating the need for time-consuming rework.

## **Machining: Secarex cutting centre**

# Precise length cutting with reduced wastage

---

Wiring ducts, support rails and cable duct covers can be precision-cut to size with the Secarex cutting centre. The cutting dimensions can be transferred directly from a CAE system in CSV format (EPLAN Pro Panel) or manually entered. The parts are then quickly and precisely cut to length and labelled on a project-specific basis using the integrated label printer.

The cutting centre includes five DIN rail sizes in one template. This ensures superior cut quality, reduced waste, speeds up the process and significantly lowers overall costs, resulting in financial pay-back after just 130 enclosures per year.

[www.rittal.com/automation](http://www.rittal.com/automation)

The **Secarex** is cost-effective  
from just **130** enclosures  
per annum.

#### **Speeded-up processes**

Simple data transfer and automated length-cutting of the parts is significantly faster and more reliable than the manual alternative.

#### **Reduced waste costs**

Because of smart waste minimisation over several projects, waste costs can be significantly reduced.

#### **Automatic labelling**

The integrated label printer automatically produces clear labels for parts after cutting.

## Speed up your wire processing

# Boost takt rate and cycle times and improve processes

---

Digital wires and fully automated wire processing on the Rittal Wire Terminal means improved efficiency and speed with reduced error rates, enabling you to process increased volumes without additional staff.

- **The Wire Terminal WT fully automated wire processing machine** has a compact design and can automatically assemble up to 36 different wires without manual intervention – including printed and labelled wire rail magazines.
- **Rittal's semi-automatic wire processing machines** can speed up routine tasks such as precise length-cutting, wire stripping and crimping with excellent repetition accuracy.

[www.rittal.com/harnessing](http://www.rittal.com/harnessing)

The systematic  
**reduction of manual pre-production work**  
 increases the **process speed**  
 by a **factor of 8**

#### Wire Terminal WT:

Fully automated wire processing including length-cutting, stripping, fitting with wire end ferrules, labelling and project-specific order picking from the dedicated storage system.

#### Rittal's semi-automatic machines:

Boost your efficiency in the workshop with wire cutting, stripping and crimping.

## Wiring support

# Perfectly streamlined processes down to the last detail

### Whether you opt for partially or fully automated wire processing:

Component wiring in the rack or on the mounting plate can be time-consuming. Rittal has developed a series of perfectly coordinated solutions to streamline this process and make wiring more reliable and efficient.

Wires processed on a project-specific basis at the Wire Terminal are easily order-picked for the Wire Cart and transported to the Wire Station wiring bench. The wires are sequentially arranged in the wire rails for simple, intuitive wiring. At the Wire Station, the wires are securely wired using robust, ergonomic hand tools. The EPLAN Smart Wiring digital assistant visually presents every step in the wiring process for superior results and to support staff.

[www.rittal.com/smart\\_wiring](http://www.rittal.com/smart_wiring)

**Wiring** typically accounts  
for **49%**  
of the **processing time**  
on an enclosure.

**EPLAN Smart Wiring:**

Digital assistant for clear presentation of the wiring process, also suitable for use on mobile output devices

**Wire Station:**

The mobile and ergonomic wiring table enables fatigue-free working

**Rittal hand tools:**

A wide assortment of screwdrivers, pliers, hole punches, cutters and other mechanical tools for professional results

## Simple handling

# Clever tools for ergonomic working

---

With the right equipment, manual tasks can be considerably simplified, streamlined and speeded up. That's why we offer a wide range of high-quality and ergonomic bench solutions for machining, assembling, wiring and testing enclosures.

Our ergonomic handling systems for transport and lifting operations make the work for fitters and service personnel easier. They are ideal for transporting materials and tools to the jobsite and can even accommodate very large components.

[www.rittal.com/handling](http://www.rittal.com/handling)

**Ergonomic tools and equipment**  
**can reduce** injuries  
 by up to **57%**

**Rittal assembly frames:**  
 With a height- and tilt-adjustable mounting level for efficient, ergonomic machining of mounting plates and enclosures.

**Rittal Smart Lifter:**  
 Powerful and sturdy lifting and transport device for easy handling of enclosures and bayed enclosure suites.

**Rittal functional trolleys:**  
 Converts from transporter to practical desk by simply unfolding. Extremely stable and rugged.

**Rittal storage and transport trolley:**  
 Ideal for storage and order picking, and for easy handling of enclosure panels.

## Moving forward together

# We offer a range of financing options

---

Digitalising and automating your value processes calls for bold decisions and investments, yet it also offers huge potential for cutting costs and boosting efficiency. Seize this potential and chart your course for your digital future.

We can assist you in your investment planning with flexible and customised payment and financing models. You benefit from attractive conditions and options ranging from trade credit to leasing.

[www.rittal.com/ras\\_financing](http://www.rittal.com/ras_financing)

## Benefits of trade credit

- Low liquidity commitment
- Planning security through fixed monthly instalments
- Repayments possible at any time

Payment models between the customer and Rittal		Financing models in association with external financial partners	
Trade credit (instalment plan)*	Direct purchase	Hire purchase*	Leasing*

\* Please ask your national company for further details.

## Professional servicing for your machines

# Service and support direct from the manufacturers

---

No-one knows your equipment better than the manufacturers. Regular maintenance of your machines by the Rittal Manufacturer's Service team is the best way to ensure their availability for use, performance and a long service life. Draw on the experience and knowledge of our highly trained qualified service technicians and benefit from dependable production quality and exceptional reliability.

### **Service agreements – Individual and fully customisable**

Everyone's service needs are different. Rittal service agreements allow you to arrange multiple services individually and also combine various service packages, all with fixed, transparent conditions.

[www.rittal.com/our-services](https://www.rittal.com/our-services)

		Scope of services included in standard contract	Optional contract package
Maintenance		1 x per year	2 x per year
Availability		Working days (Mon – Fri) 7 am – 5 pm	Every day of the week (Mon – Sun) 24 hours
On-site service		Within 72 hours Including reduced hourly rates	Within 48 hours Including reduced hourly rates
Machine warranty		No warranty extension	+ 12 months
Individual stocking of spare parts		On request	
DXF remote training		One training session	
Software update		As necessary (but excluding hardware/PC or operating system replacement)
